Revenue per style is highly concentrated in a small share of range

The top 3 sub-categories — Knee Length Dresses, Maxi Dresses, Waterfalls & Kimonos — account for 52% of revenue but only 40% of active styles. This concentration is healthy, but has implications for range width decisions, OTB allocation, and stock depth.

Sweaters & Ponchos

4% of styles driving 8.4% of revenue — one of the highest revenue-to-range-width ratios in the portfolio.

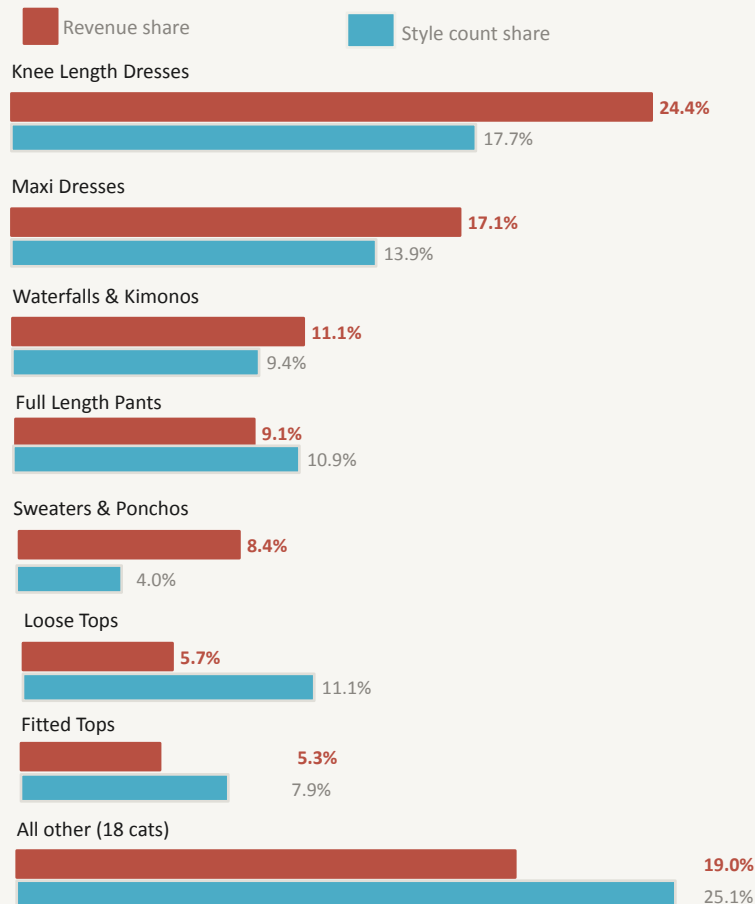

Loose Tops

11% of active styles but only 5.7% of revenue. Potential range rationalisation opportunity.

Fitted Tops

7.9% of styles, 5.3% of revenue, 21 WOC — overranged and overstocked relative to demand.

% of revenue vs % of active styles

Insight

Six subcategories require immediate inventory action

Weeks of cover (WOC) thresholds: ≤10 = healthy, 11–19 = monitor, 20–29 = watch, ≥30 = action required.

All figures based on active range (Tier 1–4) only — retired styles excluded.

Category WOC overview

* Bars capped at 100 wks for readability. Short & Mini Skirts actual = 480 wks.

Short & Mini Skirts

2 active styles, near-zero velocity. Clearance or bundling required immediately.

WOC

480

Men's Tops

4 active styles. Men's category generates <0.1% of revenue. Exit strategy needed.

WOC

114

Men's Bottoms

4 active styles. Same challenge as Men's Tops — negligible demand relative to stock.

WOC

95

Shorts & Skorts

7 active styles. Consider markdown promotion or reallocation to highest-volume stores.

WOC

61

Hoodies & Sweatshirts

3 active styles. Seasonal — evaluate whether range still appropriate for customer profile.

WOC

59

Skirts & Top Set

4 active styles. Co-ord sets showing low velocity — review pricing and styling approach.

WOC

38

Maxi Skirts

8 active styles, 611 units. Largest stock problem in the watch tier — monitor closely.

Floor space is not driving revenue proportionally

Large stores are not automatically strong performers. Several of the highest rev/sq ft stores are among the smallest in the network. Footprint size and store tier are not always aligned.

Highest rev / sq ft

1	Sarit Smallest Tier 1, top RPSF in network	KES 7,318 rev/sq ft
2	Hub Smallest store, 2nd highest RPSF	KES 6,898 rev/sq ft
2	Village Compact format working well	KES 6,232 rev/sq ft
2	Yaya Tight format, strong productivity	KES 6,076 rev/sq ft
3	Eldoret Best RPSF among Tier 3 upcountry	KES 4,952 rev/sq ft

Largest footprint vs lowest RPSF

3	Mombasa CBD 1,497 sq ft — worst RPSF in network at KES 1,049	KES 1,049 rev/sq ft
2	Moi Avenue Largest store, 2nd lowest RPSF — occupancy question	KES 1,896 rev/sq ft
2	Imaara Nearly 2,000 sq ft at Tier 2, low density	KES 1,597 rev/sq ft
3	Sarit S/Zoya Multi-brand format — review range allocation per sq ft	KES 1,734 rev/sq ft
2	TRM Large Tier 2 store underperforming on RPSF	KES 1,963 rev/sq ft

Range by price point

Total	912		562,252		KES 2,340M		66,076		

73% of styles are < 1 year old

The range is very new — most styles launched in the past 12 months. But these styles generate only 46% of revenue, showing young styles haven't yet reached velocity.

5–7 year styles are the workhorses

Just 8.3% of styles but 32.5% of units sold and 27.7% of revenue. These are the proven NOOS styles. Revenue per style in this cohort is ~12x that of styles under 1 year.

SOR climbs with age — sharply

Styles under 1 year average 81.4% SOR. Styles aged 3–4 years: 97.7%. Styles aged 5–7 years: 94.8%. A style that survives is a style that sells.

Priority actions — June 2026

01 IMMEDIATE

Exit Men's category & Short/Mini Skirts

Men's Tops (114 WOC), Men's Bottoms (95 WOC), Short & Mini Skirts (480 WOC). Mark down to clear, do not reorder. Retire remaining active styles.

02 THIS MONTH

Markdown plan for 6 overstocked categories

Shorts & Skorts (61 WOC), Hoodies (59 WOC), Skirts & Top Set (38 WOC), Maxi Skirts (31 WOC), Midi & Capri Dresses (28 WOC), Fitted Tops (21 WOC).
Markdown or bundle.

03 NEXT BUYING CYCLE

Rationalise Loose Tops and Fitted Tops

Loose Tops: 11% of range, 5.7% of revenue — overrepresented. Fitted Tops: 7.9% of range, 21 WOC, underperforming. Reduce style count in both at next range review.

04 NEXT BUYING CYCLE

Increase depth in Sweaters & Ponchos

4% of styles driving 8.4% of revenue — one of the best revenue-to-range-width ratios in the portfolio. Invest in more depth and colourway breadth at next OTB allocation.

05 LEASE REVIEW

Review large footprint stores against RPSF

Mombasa CBD (1,497 sq ft, KES 1,049/sq ft), Moi Avenue (2,500 sq ft, KES 1,896/sq ft), Imaara (1,916 sq ft, KES 1,597/sq ft) all significantly below the KES 3,410 network average.

06 ONGOING

Track 'never reordered' as a product team KPI

~19 retired styles reached only 1 purchase order and were never reordered. This is the clearest signal of initial buying errors. Tracking this rate holds the buying team accountable to launch quality.

Vertical Supply Chain & Lead Times

Sourcing: It takes about 3 weeks for organise a container in China since we source from multiple suppliers. It will only get shipped after we have paid and then takes about 4 weeks to get here and be cleared.

Lead Times: Styles take about 6 weeks from concept to sign off. It then takes 3 weeks from sign off to store launch.

Logistics: Nairobi stores can receive new stock daily, depending on how much they have sold. Out of town Kenya stores receive stock once or twice a week. Out of country stores get shipped stock weekly.

Product Team Structure:

The Product Team is managed by **Wandia** and has 25 people in it, broken down into the following teams:

1. Buying Team - 10 people managed by **Mary Nyambura**
2. Pattern and Sampling Team - 10 people managed by **Florence Bwibo**
3. CAD Team - 5 people and is managed by **Re Amulyoto**

Stephen currently owns the overall budget planning and sign-off.

Financials & Margin Health:

Current intake margin is 32% vs. net achieved margin of 38% (Stephen - please confirm)

Budgeting: What is the strategic rationale around budgets/financial planning?

We have an annual budget approved by the board. We then break that down into quarters & months, and every month we produce a PRODUCT PLAN (see here for June 2026 product plan), which is the breakdown of products we will order to ensure there is sufficient inventory for our July 2026 revenue target.

Information not yet available:

Store Profiling & Performance

- **Ecomm site:** 24 months of sales (units, value, Cover, ASP (average selling price), ROS (Rate of sale))
- A breakdown of **best and worst** selling styles overall per quarter and by store
- **Regional/National Nuances:** Any known seasonal or cultural/religious peaks (e.g., Ramadan/ cold mid-year)

Product & Inventory

- **The Mix:** The current ratio of **Core/Flow lines** vs. **New** drops. We don't use the term FLOW.
- **Price Architecture:** The current Entry, Mid, and Exit price points. We haven't structured the data in this way yet.
- **Aged fabric stock:** Amount of fabric stock we are holding that is aged (6 months and longer) and meterage by type by year.
